

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the specification on page 2 at lines 5-30 as follows:

The subject matter of the invention is likewise an apparatus for carrying out this method in line with claim 10, computer programs and computer program products in line with claims 11 and 13, and also an electronic data structure or an electronic document which can be obtained or has been obtained in accordance with one of the methods based on the invention. The invention also covers computer programs on or embedded in a data storage medium which can be used to load the programs into a computer and to carry out the inventive method. The program may be in the form of a source code, an object code or a hybrid code, in fully or partially compiled form. The data storage medium may be any unit or apparatus which is suitable for holding a program: ROM, e.g. CD-ROM or a semiconductor ROM or DVD ROM, a magnetic storage medium, e.g. a floppy disk or hard disk, ~~a transferable carrier, such as an electrical or optical signal which can be transferred via electrical or optical lines or via electronic waves such as radio or radio waves, or another suitable carrier. If the program is held in a signal which is routed via a cable or another means or medium, then the cable or the other means or medium can be the data storage medium.~~ Alternatively, the program may be embedded in an integrated circuit which is provided for carrying out the inventive method.
